OUR SOLUTION

FLEET MANAGEMENT

ABOUT RAMM TECHNOLOGIES

RAMM Technologies provides turnkey services and solutions that span the entire data value chain, establishing secure and spontaneous data transfer over a multitude of networks. RAMM provides accurate real time data analysis and visualization in the form of flexible and intelligent reporting.

SOLUTIONS

Logistics Management

Asset Management

Inventory Management

Workforce Management

RAMM FLEET MANAGEMENT

Fleet Management is an integral part of every company that owns vehicles. Managing a fleet properly increase profits, efficiency and productivity. RAMM Fleet Management Solutions offer a full Fleet Management System to run any fleet to its maximum capacity.

FEATURES

Below are some of the main features that the RAMM Fleet Management solution can offer.

Advanced Software

RAMM's Fleet Management application, RAMM Explorer can be accessed through workstations and mobile devices. It consist of an extensive spatial framework and GIS capability.

Live Tracking

Pin point location and historical information with Driver Identification.

Extensive Reports

Extensive reports ranging from trip reports, fuel, utilisation, driver behaviour, maintenance, speeding to name a few.

RAMM FLEET MANAGEMENT

Our integrated reporting and analytics engine is able to provide flexible, intelligent visualisations of multiple data sets for an optimal analysis of resource and asset utilisation across multiple sectors of your business. This enables our clients to integrate their business processes to the fleet management, asset management and mobile workforce component, and in turn provide an improved service to their own customers.

BENEFITS

Performance Management

Drivers need to be monitored and trained to enable increased productivity and accountability

Asset Life Cycle Management

Vehicle life cycle is managed for efficiency

Real Time Tracking

Monitoring and management to increase service delivery

Real Time Report Generation

Fleet managers have all data available at their fingertips 24/7

MISSION STATEMENT

We aim to create long lasting relationships with our clients. We offer both technology and sustainable management solution that will contribute significantly towards the effective utilization of our Management System.
